AAMT is the nation's premier organisation of mathematics educators: supporting and enhancing the work of teachers; promoting the learning of mathematics; representing and promoting interests in mathematics education.

Contents

CL1. Mystery number 1

✂

What number am I?

I have two digits	I am an even number
One of my factors is 7	I am less than 50
I am bigger than 20	I have more ones than tens

CL2. Mystery number 2

✂

What number am I?

I have two digits	I am an odd number
I am smaller than 60	I am greater than 30
I can be divided exactly by 5	My two digits add up to be an odd number

CL37. Algebra 5

✂

What is the correct formula?
Bella is an electrician. What is the correct formula for working out Bella's charges when she works?

Bella's charges depend on how long she spends working	Bella's charges include two parts - a fixed charge and an hourly rate	Bella's fixed charge for each visit is $50, no matter how long she stays and works
Bella charges $80 for each hour she works	The formula uses the pronumeral *h* for the number of hours Bella works	Use *C* for Bella's total charge in dollars

C = 80h + 50	C = 80h - 50
C = 30h	C = 30h + 50
C = 50h + 80	C = 80h
